Lenin consequent et contradiccion Trotsky

By Shomit Sirohi (Synthesis of Recent Writings)

Introduction

Mao, Lenin and Trotsky, just the dialectic I wanted to learn in EGS when I was young. I would ask the philosophers there, what then is the dialectic in practical state, how do we comprehend it?

I paraphrase an answer – just the steps of daily life, and praxis, merged into this type of basic stuff in Mao, and transformed to Alain Badiou, or in your case, experimentalism in Trotsky merged with in fact Hegel, and for Lenin, that old stuff, you call his works all with commentaries.

I. On Sirohianism – Lenin

Just the absolute in Hegel.

I argue in each step. In even basic learning.

II. On Sirohianism as well – Leon Trotsky

I know it sounds elementary, that's the genius of the conceptual process.

It can be learnt by anyone, if one is willing.

I call this genius at work, if it fails, it will be absolute, and this then has a joke, Messianic.
